0001	**Feature:** Social-Login Migration	
0002	**Background:**	
0003	Given the DCP → Base migration has finished	✔
0004	And Web3auth has replaced Torus authentication	
0005		
0006	**Scenario:** Google user completes migration	
0007	Given the user logs in with Google	✔
0008	When the DCP Account Declaration dialog appears	✔
0009	And the user selects "Yes" (I have an existing account)	✔
0010	When the migration confirmation dialog appears	✔
0011	Then it lists the preservation of reputation, FILMCredits → TALNT, and NFT migration	✔
0012	When the user clicks "OK"	✔
0013	Then asset discovery starts and all claimable assets are listed	✔
0014	And each status transitions from ISSUING → ISSUED in real time	✔
0015	When all assets are ISSUED the user clicks "OK"	✔
0016	Then they land on their DCP dashboard with updated balances	✔
0017		
0018	**Scenario:** Google user creates new account (with confirmation)	
0019	Given the user logs in with Google	✔
0020	When the DCP Account Declaration dialog appears	✔
0021	And the user selects "No" (I'm a new user)	✔
0022	Then an orange warning appears asking for confirmation	✔
0023	When the user confirms they want to create a new account	✔
0024	Then a new DCP account is created and linked to their Google identity	✔
0025	And they proceed through the new user onboarding flow	✔
0026		
0027	**Scenario:** Twitter user links an existing account	
0028	Given the user logs in with Twitter	✔
0029	When the DCP Account Declaration dialog appears	✔
0030	And the user selects "Yes"	✔
0031	Then a signing request is sent to their legacy wallet	✔
0032	When the signature succeeds the Base-Appchain dialog appears	✔
0033	And the user proceeds as in *Google user completes migration*	✔
0034		
0035	**Scenario:** Apple user with multiple email addresses	
0036	Given the user logs in with Apple ID	✔
0037	When the DCP Account Declaration dialog appears	✔
0038	And the user selects "Yes" (I have an existing account)	✔
0039	Then the system prompts for manual account identification	✔

			date	05 Jun 20
			build	June 5 20

0040	When the user provides their DCP username or wallet address	✔
0041	Then the system verifies their identity via signature	✔
0042	And the migration proceeds normally	✔
0043		
0044	**Feature:** External-Wallet Migration	
0045	**Background:**	
0046	Given the DCP → Base migration has finished	✔
0047	And the user opens the DCP app	✔
0048		
0049	**Scenario: Sentinel/Temple user migrates with EVM wallet**	
0050	Given the user connects a Tezos wallet (Sentinel or Temple)	✔
0051	When the DCP Account Declaration dialog appears and the user selects "Yes"	✔
0052	Then a legacy-wallet signature is requested and confirmed	✔
0053	And the Base-Appchain dialog shows the EVM address	✔
0054	When the user clicks "OK" the Issuing screen appears	✔
0055	Then DCP Ledger = ISSUING, External = UNISSUED	✔
0056	When the user verifies address and authorises TALNT transfer (2 signatures)	✔
0057	Then both sections become ISSUED and a completion dialog appears	✔
0058	And selecting "OK" redirects to the main DCP application	✔
0059		
0060	**Feature:** Wallet-Only Migration – Sentinel	
0061	**Scenario: Sentinel user claims TALNT without a DCP account**	
0062	Given the user visits /migration/	✔
0063	And connects a Sentinel T4L3NT wallet	✔
0064	And connects an EVM wallet (Coinbase / MetaMask)	✔
0065	When the DCP Account Declaration dialog appears	✔
0066	And the user selects "Yes" (I have tokens to claim)	✔
0067	When the Issuing dialog appears asset statuses start at ISSUING / UNISSUED	✔
0068	When the user signs "Verify T4L3NT Net Address" and "Authorise TALNT Transfer"	✔
0069	Then both assets move to ISSUED and the "You're all set!" page shows balances	✔
0070		
0071	**Feature:** Wallet-Only Migration – Ledger	
0072	**Scenario: Ledger user claims TALNT via advanced flow**	
0073	Given the user selects the **Ledger** tab on /migration/	✔
0074	When the DCP Account Declaration dialog appears	✔
0075	And the user selects "Yes" (I have tokens to claim)	✔
0076	When the user connects the Ledger device and selects an account	✔
0077	And connects an EVM wallet	✔
0078	Then the flow mirrors **Sentinel user claims TALNT** with two signatures and final confirmation	✔
0079		
0080	**Feature:** Account Declaration Dialog Testing	
0081	**Scenario: User accidentally selects "No" but has existing account**	
0082	Given any user logs in with any method	✔
0083	When the DCP Account Declaration dialog appears	✔
0084	And the user mistakenly selects "No"	✔
0085	Then an orange warning appears with text "Are you sure you want to create a new account?"	✔
0086	When the user realizes their mistake and cancels	✔

		number tester date build	1 anyone 05 Jun 20 June 5 20
0087	**Then** they can select "Yes" to access their existing account		✔
0088			
0089	**Scenario: New user confirms account creation**		
0090	**Given** a genuine new user logs in		✔
0091	**When** the DCP Account Declaration dialog appears		✔
0092	**And** the user selects "No" (I'm a new user)		✔
0093	**And** the orange warning appears		✔
0094	**When** the user confirms they want to create a new account		✔
0095	**Then** a new account is created successfully		✔
0096	**And** they receive appropriate onboarding		✔
0097			
0098	**Feature: Asset Status Engine**		
0099	**Scenario Outline: Status transitions per asset type**		
0100	**Given** the Issuing dialog shows \<Asset> status \<StartStatus>		✔
0101	**When** the blockchain operation for \<Asset> completes		✔
0102	**Then** the status changes to ISSUED		✔
0103	**Examples:**		
0104	| Asset | StartStatus |		✔
0105	| DCP Ledger | ISSUING |		✔
0106	| External Account | UNISSUED |		✔
0107	| FilmCrew NFTs | UNISSUED |		✔
0108			
0109	**Feature: Failure & Retry Handling**		
0110	**Scenario: Transaction failure triggers automatic retry**		
0111	**Given** the user is claiming assets		—
0112	**And** the External Account transfer fails with a timeout		—
0113	**Then** the UI marks the transfer as FAILED and starts a retry		—
0114	**When** the retry succeeds the status becomes ISSUED and the flow continues		—
