Mobile User Tests of DCP Stake and Bridge

		number tester date build	1 MK 19 Jun 20

0001	**Feature:** **Mobile staking of TALNT on the DCP network**	
0002	**Background:**	
0003	**Given** **the user has already added the "Base Appchain Testnet" network to the wallet**	
0004	And the user has ≥ 20 TALNT on Base Appchain	✔
0005	And the user has browsed to https://talnt.net/stake in a mobile browser or DApp-browser tab	✔
0006		
0007	**Scenario Outline:** **Stake TALNT from a supported mobile wallet**	
0008	**Given** **the user is on <platform> using <wallet>**	
0009	And <wallet> is connected to the staking dApp	✔
0010	**When** **the user types <stake_amount> into the "Amount to stake" field**	
0011	And the user taps the "Stake" button	✔
0012	And the user confirms the transaction in <wallet>	✔
0013	**Then** **the "Total staked balance" increases by <stake_amount> TALNT**	
0014	And the "Frozen balance" equals the new stake	⊘
0015	And an estimated APY is displayed	⊘
0016		
0017	**Examples:**	
0018	| platform | wallet | stake_amount |	—
0019	| iOS | MetaMask Mobile | 10 |	✘ MIG-63†
0020	| iOS | Coinbase Wallet | 10 |	✘ MIG-63†
0021	| Android | MetaMask Mobile | 10 |	✘ MIG-62†
0022	| Android | Coinbase Wallet | 10 |	✘ Mig-62†
0023	| Android | Wallet Connect - Coinbase | 10 |	✘ MIG-64†
0024	| Android | Wallet Connect - Metamask | 10 |	✘ †
0025		
0026	**Scenario:** **Unstake part of the frozen balance after the round ends**	
0027	Given the user's round has ended and some TALNT are frozen	⊘
0028	**When** **the user enters 15 in the "Amount to unstake" field**	
0029	And taps the "Unstake" button	⊘
0030	And confirms in the wallet	⊘
0031	**Then** **"Frozen balance" decreases by 15 TALNT**	
0032	And available balance increases by 15 TALNT	⊘
0033	And total staked balance reflects the change	⊘
0034		
0035	**Feature:** **Mobile bridging of TALNT between Base Network and TALNT Network**	
0036	**Background:**	
0037	**Given** **the user holds ≥ 5 TALNT on Base Network**	
0038	And the user has browsed to https://talnt.net/bridge on mobile	⊘
0039		
0040	**Scenario Outline:** **Bridge TALNT using a supported mobile wallet**	

		number	1
		tester	MK
		date	19 Jun 20
		build	

0041	**Given** the user is on **\<platform\>** using **\<wallet\>**	
0042	And \<wallet\> is connected to the bridge dApp	⊘
0043	**When** the user enters **\<bridge_amount\>** in the "Amount to bridge" field	
0044	And taps the "Bridge" button	⊘
0045	And confirms the transaction in \<wallet\>	⊘
0046	**Then** the Base-network balance decreases by **\<bridge_amount\>**	
0047	And the TALNT-network balance increases by \<bridge_amount\>	⊘
0048	And a link to the explorer transaction is shown	⊘
0049		
0050	**Examples:**	
0051	| platform | wallet | bridge_amount |	⊘
0052	| iOS | MetaMask Mobile | 5 |	⊘
0053	| iOS | Coinbase Wallet | 5 |	⊘
0054	| Android | MetaMask Mobile | 5 |	⊘
0055	| Android | Coinbase Wallet | 5 |	⊘
0056		
0057	**Scenario:** Show gas-payment hint	
0058	Given the gas-payment chip reads "Gas costs paid in ETH"	⊘
0059	When the user switches wallets or networks	⊘
0060	Then the gas-payment hint updates to reflect the active network currency	⊘
0061		
0062		

COMMENT DETAIL

0016	
0017	Examples:
0019	| iOS | MetaMask Mobile | 10 |
✖	MIG-63 error messge appears saying "you have cancelled signing the action"
0020	| iOS | Coinbase Wallet | 10 |
✖	MIG-63 error messge appears saying "you have cancelled signing the action"
0021	| Android | MetaMask Mobile | 10 |
✖	📱 MIG-62 wallet cannot be reached on the phone, error message as in screen shot, "please add wallet adapter"
0022	| Android | Coinbase Wallet | 10 |
✖	Mig-62 wallet cannot be reached on the phone, error message in scene shot, "please add wallet adapter"
0023	| Android | Wallet Connect - Coinbase | 10 |
✖	MIG-64 Coinbase wallet not detected by Wallet Connect
0024	| Android | Wallet Connect - Metamask | 10 |

✖   The message says "install PWA on IOS - install the DCP app on
       your home screen". But after dismissing this, you can continue..
